1969 Subject Index of Articles

All major articles are classified by subject in the columns below, including titles by E.T. Larson from the "Engineers' Corner." Most of them fit under more than one category. Tear sheets are available as long as supply lasts.

ABRASIVE MACHINING

Giant Internal: 50 Millionths Runout in 82 In. Stroke by Morris Lapidus — Feb/p.22
Finishing Ball Tracks–A Complete Abrasives Process by Joseph E. Broyles & Clarence W. Olsen — Feb/p.30
Abrasives Widen Scope of Investment Casting by Charles Porter — March/p.28
Higher Wheel Speeds "Make" Cylindrical Abrasive Machining — Aug/p.24
Abrasive Cutting Systems — Aug/p.34
Diamond Wheels "Shape Up" for Machining Steel by Richard L. McKee — Sept/p.24
Formula for Selecting Machining Methods by Richard P. Lindsay — Sept/p.38
Designer's Nightmare Eats Up Everything But Profits — Oct/p.18
Standard Time Data for Abrasive Machining by E.A. Cyrol — Nov/p.24

ABRASIVE BELTS

Cut Costs with Proper Coated Storage by James E. Denaker — Jan/p.20
Two-Way Saving in Belt Deburring — March/p.20
Belts Condition Stainless . . . One Pass Per Side by Richard L. McKee — March/p.24
Grinder with the Boardinghouse Reach — March/p.30
Belts Contour Plates for Space Tanks — April/p.46
The Backstand: An Integral Part of Abrasive Belt Use by Fred B. Williams — May/p.22
Anatomy of Contact Wheels — July/p.78

ABRASIVE ENGINEERING

New Approach to Abrasive Engineering at National Cash Register — June/p.20

ABRASIVE GRAIN

What You Should Know About Grain Sizes by Travis E. Whitlow — July/p.74
The Function of Shape in Extruded Grain — Aug/p.22

BALL GRINDING

Finishing Ball Tracks–A Complete Abrasives Process by Joseph E. Broyles & Clarence W. Olsen — Feb/p.30

BLASTING

Metal Abrasives–All Purpose Variable in Blast Cleaning by Einar A. Borch — Nov/p.20

BUFFING

Buff, Polish Pen and Pencil Casings at 35,000 Per Shift — May/p.28
Abrasives Highlight 7th Industrial Finishing Exposition — June/p.26
Polishing and Buffing Charts — July/p.70

CENTERLESS GRINDING

Centerless Grinding 304SS by E.T. Larson — April/p.12
Contouring with a Centerless — June/p.26
Table of Thrufeed Work Traverse Rates — July/p.72
Stock Removal Conversion Table for Rounds — July/p.80
Designer's Nightmare Eats Up Everything But Profits — Oct/p.18

COATED ABRASIVES

Cut Costs with Proper Coated Storage by James E. Denaker — Jan/p.20
Grind the Lead Off–Safely — April/p.48
Diamonds = Longevity in Coated Abrasives — Sept/p.53
Removal Rate: Key to Abrasive Belt Economy by Stanley L. Johnson — Oct/p.22

COOLANTS

Solving Coolant Problems — July/p.77
Know Your Grinding Fluids by E.T. Larson — Aug/p.12
Don't Always Blame the Grinding Wheel–Check the Coolant Concentration by E.T. Larson — Sept/p.14
Coolant Retards Diamond Wear by E.T. Larson — Oct/p.14

COOLANT EQUIPMENT

Basics of Filtration by M.M. Patterson — July/p.66
Mist Control Puts Grinder Back in Line-Up — Sept/p.48

COSTS OF GRINDING

Removal Rate: Key to Abrasive Belt Economy by Stanley L. Johnson — Oct/p.22

CUTOFF GRINDING

Abrasive Cutoff Triples Slug Cutting Speed — March/p.31
Abrasive vs. Steel Saw Cutoff by E.T. Larson — April/p.12
Abrasive Cutting Systems — Aug/p.34

CYLINDRICAL

Using Steadyrests in OD Grinding by E.T. Larson — March/p.16
Cylindrical Grinding Ceramics by E.T. Larson — April/p.24
Stock Removal Conversion Table for Rounds — July/p.80
Higher Wheel Speeds "Make" Cylindrical Abrasive Machining — Aug/p.24
Is Long Spark-Out Your Trouble? by E.T. Larson — Nov/p.12
Center Holes and Work Centers–Don't Overlook Them by E.T. Larson — Dec/p. 10
Grinding Nomograph for Round Parts — Dec/p. 28

DEBURRING

Two-Way Saving in Belt Deburring — March/p.20
Deburring Process Goes Through the Mill — Oct/p.26

DIAMONDS

Diamonds Essential to Machine Ferrites — May/p.26
Sound of Diamonds — July/p.26
Diamond Reclamation–Now and in the 70's — Aug/p.18
Diamonds = Longevity in Coated Abrasives — Sept/p.53
IDA/ASTME Sponsor Second International Diamond Meet — Oct/p.20
RVG-D: Breakthrough in Dry Carbide Grinding by Paul A. Wrobleski — Nov/p.34

DIAMOND DRESSERS

Don't Baby the Dressing Diamond by E.T. Larson — July/p.57
Dressing Your Wheels Too Often? by E.T. Larson — Sept/p.14
Coolant Retards Diamond Wear by E.T. Larson — Oct/p.14
Grinding a Sharp V-Groove . . . by E.T. Larson — Nov/p.12

DIAMOND WHEELS

Grinding Conditions and Resin-Bonded Diamond Wheels by James C. Houck & John W. Ripple — Jan/p.18
Inside the Diamond Wheel–Part I by V.R. Conradi — Feb/p.36
Sound of Diamonds — July/p.26
Tips for Using Diamond Wheels — July/p.71
Diamond Wheels "Shape Up" for Machining Steel by Richard L. McKee — Sept/p.24
To Stretch Your Diamond Wheel Life, Try an Oil Mist by E.T. Larson — Dec/p. 10

DISC GRINDING

Single Spindle Disc Grinder — June/p.30
Double Disc Grinder Puts Squeeze on Plier Tolerances — Nov/p.38

DUST CONTROL

Centralization Cuts Dust Control Costs — May/p.25

EDITORIALS

Bending the Hunch Factor — Jan
Now Number One — Feb
Help Stamp Out Abrasives Myths — March
Where the Boys Aren't — April
Playing Our Song . . . ? — May
No Longer Just Rectification — June

1969 Subject Index of Articles

All major articles are classified by subject in the columns below, including titles by E.T. Larson from the "Engineers' Corner." Most of them fit under more than one category. Tear sheets are available as long as supply lasts.

ABRASIVE MACHINING

Giant Internal: 50 Millionths Runout in 82 In. Stroke by Morris Lapidus — Feb/p.22
Finishing Ball Tracks–A Complete Abrasives Process by Joseph E. Broyles & Clarence W. Olsen — Feb/p.30
Abrasives Widen Scope of Investment Casting by Charles Porter — March/p.28
Higher Wheel Speeds "Make" Cylindrical Abrasive Machining — Aug/p.24
Abrasive Cutting Systems — Aug/p.34
Diamond Wheels "Shape Up" for Machining Steel by Richard L. McKee — Sept/p.24
Formula for Selecting Machining Methods by Richard P. Lindsay — Sept/p.38
Designer's Nightmare Eats Up Everything But Profits — Oct/p.18
Standard Time Data for Abrasive Machining by E.A. Cyrol — Nov/p.24

ABRASIVE BELTS

Cut Costs with Proper Coated Storage by James E. Denaker — Jan/p.20
Two-Way Saving in Belt Deburring — March/p.20
Belts Condition Stainless . . . One Pass Per Side by Richard L. McKee — March/p.24
Grinder with the Boardinghouse Reach — March/p.30
Belts Contour Plates for Space Tanks — April/p.46
The Backstand: An Integral Part of Abrasive Belt Use by Fred B. Williams — May/p.22
Anatomy of Contact Wheels — July/p.78

ABRASIVE ENGINEERING

New Approach to Abrasive Engineering at National Cash Register — June/p.20

ABRASIVE GRAIN

What You Should Know About Grain Sizes by Travis E. Whitlow — July/p.74
The Function of Shape in Extruded Grain — Aug/p.22

BALL GRINDING

Finishing Ball Tracks–A Complete Abrasives Process by Joseph E. Broyles & Clarence W. Olsen — Feb/p.30

BLASTING

Metal Abrasives–All Purpose Variable in Blast Cleaning by Einar A. Borch — Nov/p.20

BUFFING

Buff, Polish Pen and Pencil Casings at 35,000 Per Shift — May/p.28
Abrasives Highlight 7th Industrial Finishing Exposition — June/p.26
Polishing and Buffing Charts — July/p.70

CENTERLESS GRINDING

Centerless Grinding 304SS by E.T. Larson — April/p.12
Contouring with a Centerless — June/p.26
Table of Thrufeed Work Traverse Rates — July/p.72
Stock Removal Conversion Table for Rounds — July/p.80
Designer's Nightmare Eats Up Everything But Profits — Oct/p.18

COATED ABRASIVES

Cut Costs with Proper Coated Storage by James E. Denaker — Jan/p.20
Grind the Lead Off–Safely — April/p.48
Diamonds = Longevity in Coated Abrasives — Sept/p.53
Removal Rate: Key to Abrasive Belt Economy by Stanley L. Johnson — Oct/p.22

COOLANTS

Solving Coolant Problems — July/p.77
Know Your Grinding Fluids by E.T. Larson — Aug/p.12
Don't Always Blame the Grinding Wheel–Check the Coolant Concentration by E.T. Larson — Sept/p.14
Coolant Retards Diamond Wear by E.T. Larson — Oct/p.14

COOLANT EQUIPMENT

Basics of Filtration by M.M. Patterson — July/p.66
Mist Control Puts Grinder Back in Line-Up — Sept/p.48

COSTS OF GRINDING

Removal Rate: Key to Abrasive Belt Economy by Stanley L. Johnson — Oct/p.22

CUTOFF GRINDING

Abrasive Cutoff Triples Slug Cutting Speed — March/p.31
Abrasive vs. Steel Saw Cutoff by E.T. Larson — April/p.12
Abrasive Cutting Systems — Aug/p.34

CYLINDRICAL

Using Steadyrests in OD Grinding by E.T. Larson — March/p.16
Cylindrical Grinding Ceramics by E.T. Larson — April/p.24
Stock Removal Conversion Table for Rounds — July/p.80
Higher Wheel Speeds "Make" Cylindrical Abrasive Machining — Aug/p.24
Is Long Spark-Out Your Trouble? by E.T. Larson — Nov/p.12
Center Holes and Work Centers–Don't Overlook Them by E.T. Larson — Dec/p. 10
Grinding Nomograph for Round Parts — Dec/p. 28

DEBURRING

Two-Way Saving in Belt Deburring — March/p.20
Deburring Process Goes Through the Mill — Oct/p.26

DIAMONDS

Diamonds Essential to Machine Ferrites — May/p.26
Sound of Diamonds — July/p.26
Diamond Reclamation–Now and in the 70's — Aug/p.18
Diamonds = Longevity in Coated Abrasives — Sept/p.53
IDA/ASTME Sponsor Second International Diamond Meet — Oct/p.20
RVG-D: Breakthrough in Dry Carbide Grinding by Paul A. Wrobleski — Nov/p.34

DIAMOND DRESSERS

Don't Baby the Dressing Diamond by E.T. Larson — July/p.57
Dressing Your Wheels Too Often? by E.T. Larson — Sept/p.14
Coolant Retards Diamond Wear by E.T. Larson — Oct/p.14
Grinding a Sharp V-Groove . . . by E.T. Larson — Nov/p.12

DIAMOND WHEELS

Grinding Conditions and Resin-Bonded Diamond Wheels by James C. Houck & John W. Ripple — Jan/p.18
Inside the Diamond Wheel–Part I by V.R. Conradi — Feb/p.36

1969 Subject Index

Measure of an Industry — July
Where the Ducks Are — Aug
If . . . Why Can't We . . . ? — Sept
Diamonds are Trumps in October — Oct
Let's Take Off the Blinders — Nov
Vanishing Tool Grinders? — Dec

ELECTROCHEMICAL GRINDING

Electrolytic Internal Saves on Carbide Grinding
by Heinz H. Benz — March/p.40
United Air Lines Takes ECG Out of Toolroom
by Max Haberstich — April/p.38

EXOTIC MATERIALS

Centerless Grinding 304SS
by E.T. Larson — April/p.12
Cylindrical Grinding Ceramics
by E.T. Larson — April/p.24
Dry Grinding High C and CR Die Steel
by E.T. Larson — June/p.12
Titanium Alloys
by E.T. Larson — June/p.12
Is Grinding High-Vanadium Tool Steel Your Problem
by E.T. Larson — July/p.56

FORM GRINDING

Belts Contour Plates for Space Tanks — April/p.46
Contouring with a Centerless — June/p.26

FUNDAMENTALS OF GRINDING

Grinding Wheel Grade Only One Factor
by E.T. Larson — Feb/p.14
Selecting a General Purpose Wheel
by E.T. Larson — May/p.12
Hard Grinding Action
by E.T. Larson — Aug/p.12
Rules for Good Abrasives Practice
by E.T. Larson — Oct/p.12
The Wear Mechanisms of Grinding Wheels
by Dr. Stephen Malkin — Oct/p.30
Is Long Spark-Out Your Trouble?
by E.T. Larson — Nov/p.12
Grinding Nomograph for Round Parts — Dec/p. 28

GENERAL

The Abrasives Industry–An Appraisal
by Richard L. McKee — Jan/p.22
Abrasives International at ASAM 1969 — Feb/p.26
ASTME Tool Show . . . The Engineering Conference — April/p.30
ASTME Tool Show . . . Abrasive Engineering's Guide — April/p.32
ASTME Tool Show . . . The Tool Exposition — April/p.34
ASTME–The Tool Exposition — May/p.59
ASAM Scores Big at Hartford Convention — June/p.24
Buyer's Guide — July/BG1-48
Handbook — July/p.65

GRINDING WHEELS

Grinding Wheel Grade Only One Factor
by E.T. Larson — Feb/p.14
Flange Screw Tightening
by E.T. Larson — May/p.10
Selecting a General Purpose Wheel
by E.T. Larson — May/p.12
Proper Diameter Wheel
by E.T. Larson — May/p.14
Higher Wheel Speeds "Make" Cylindrical Abrasive Machining — Aug/p.24
Don't Always Blame the Grinding Wheel–Check the Coolant Concentration
by E.T. Larson — Sept/p.14
G-Ratio Myth
by Kendall H. Spencer — Sept/p.46
Grinding Wheels Should Be Worked!
by E.T. Larson — Oct/p.12
The Wear Mechanisms of Grinding Wheels
by Dr. Stephen Malkin — Oct/p.30

HONING

Adaptive Control in Honing — June/p.34

INTERNAL GRINDING

Giant Internal: 50 Millionths Runout in 82 In. Stroke
by Morris Lapidus — Feb/p.22
Electrolytic Internal Saves on Carbide Grinding
by Heinz H. Benz — March/p.40

LAPPING

Lapping "Only Way" to Finish Memory Discs — May/p.30
Dual-Wheel Lapping Key to Pump Quality — June/p.28
Lapping the "Oddball" Rounds — Nov/p.30

MANAGEMENT

Abrasives Widen Scope of Investment Casting
by Charles Porter — March/p.28
New Approach to Abrasive Engineering at National Cash Register — June/p.20
Basics of Filtration
by M.M. Patterson — July/p.66
A Long Way from the Swing Frame — Dec/p. 24

METALLIC ABRASIVES

Metal Abrasives–All Purpose Variable in Blast Cleaning
by Einar A. Borch — Nov/p.20

NUMERICAL CONTROL

N/C Vertical Grinder Merger Achieves "Mission Impossible" — May/p. 18
Adaptive Control in Honing — June/p.34

PORTABLE GRINDING

Replace Portable Grinder Guards
by E.T. Larson — Nov/p.12

PRODUCTION

Grinder with the Boardinghouse Reach — March/p.30
Abrasive Cutoff Triples Slug Cutting Speed — March/p.31
United Air Lines Takes ECG Out of Toolroom
by Max Haberstich — April/p.38
Grind the Lead Off–Safely — April/p.48
Buff, Polish Pen and Pencil Casings at 35,000 Per Shift — May/p.28
Formula for Selecting Machining Methods
by Richard P. Lindsay — Sept/p.38
G-Ratio Myth
by Kendall H. Spencer — Sept/p.46
Mist Control Puts Grinder Back in Line-Up — Sept/p.48
Removal Rate: Key to Abrasive Belt Economy
by Stanley L. Johnson — Oct/p.22
The Method's the Answer in Precision Roll Grinding
by A.T. Richter — Oct/p.34
Double Disc Grinder Puts Squeeze on Plier Tolerances — Nov/p.38

RESEARCH & DEVELOPMENT

Inside the Diamond Wheel–Part 1
by V.R. Conradi — Feb/p.36
Inside the Diamond Wheel–Part 2
by V.R. Conradi — March/p.34
The Function of Shape in Extruded Grain — Aug/p.22
British Research on Abrasives
by E.M. Hargreaves — Sept/p.26
New Developments Raise Vibrator Efficiency
by William E. Brandt — Sept/p.32
The Wear Mechanisms of Grinding Wheels
by Dr. Stephen Malkin — Oct/p.30

ROLL GRINDING

The Method's the Answer in Precision Roll Grinding
by A.T. Richter — Oct/p.34

SAFETY

User's Responsibility for Safety
by E.T. Larson — Jan/p.10
Enforcing Safety Practices Demands Cooperation
by E.T. Larson — Feb/p.14
Replace Portable Grinder Guards
by E.T. Larson — Nov/p.12

SNAGGING

Belts Condition Stainless . . . One Pass per Side
by Richard L. McKee — March/p.24
A Long Way from the Swing Frame — Dec/p. 24

STANDARD TIME DATA

Standard Time Data for Abrasive Machining
by E.A. Cyrol — Nov/p.24
Standard Time Data for Surface Grinding
by E.A. Cyrol — Dec/p. 18

SURFACE GRINDING

Cross-Hatch Scratch Pattern
by E.T. Larson — Feb/p.14
Standard Time Data for Surface Grinding
by E.A. Cyrol — Dec/p. 18

TOOL & CUTTER GRINDING

Sharpening Helical Gash Cutters
by E.T. Larson — May/p.10
Repairing a Slab Milling Cutter
by E.T. Larson — June/p.12
Tool and Cutter Tips — July/p.76
RVG-D Breakthrough in Dry Carbide Grinding
by Paul A. Wrobleski — Nov/p.34

TOOLROOM GRINDING

Electrolytic Internal Saves on Carbide Grinding
by Heinz H. Benz — March/p.40
Grinding Carbide Tipped Scrapers
by E.T. Larson — April/p.12

UNIVERSAL GRINDING

N/C Vertical Grinder Merger Achieves "Mission Impossible" — May/p.18
Correcting for Taper
by E.T. Larson — Nov/p.12

VIBRATORY FINISHING

New Developments Raise Vibrator Efficiency
by William E. Brandt — Sept/p.32
Deburring Process Goes Through the Mill — Oct/p.26

WORK HOLDERS

Getting a Grip on Non-Ferrous Work — Aug/p.33

□
